

MANUAL LITHO LABEL LAMINATOR MODEL LM-134E/1250 P

Any corrugated box is suitable for labelling irrespective of size and weight. All that counts in the size and positioning of the label is the visual appearance and impression of the box created on a prospective buyer and the specific information about the product to increase its perceived value. The simple hand fed spot labelling machine model LM-123/1250 P is suitable for labelling as well as full sheet mounting of different materials.

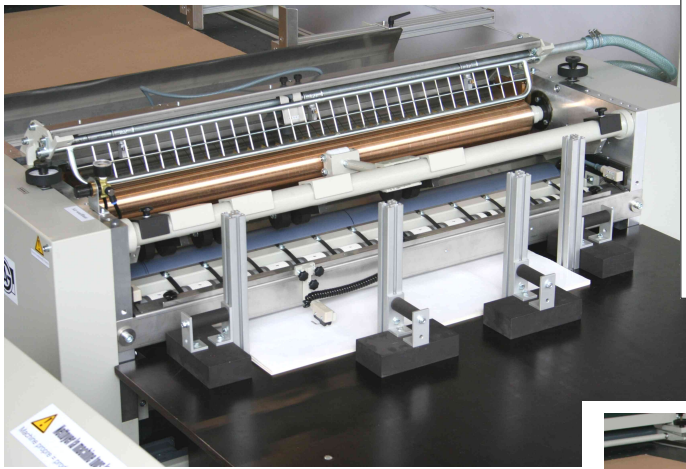

Consisting of:

- manual label feeding table – single sheet
- optional: automatic litho label feeder model 4E/1250 – single sheet feeding
- gluing unit with automatic glue feeding (P)
- sensor for detecting and registering the glued label
- label registering unit – for placing and applying the corrugated blank to the glued label
- manual feeding of the corrugated blank or box
- pressure roller
- take-off table for manual stacking
- suction belt

labeling section: manual application of the corrugated blank to the glued and placed label

label feeder: single sheet feeding

The manual labeler designed allows your market entry by keeping the investment affordable.
